

ASMITA G V

+91 9148719086 · gujjarasmita@gmail.com · LinkedIn · GitHub · Portfolio · Bengaluru, India

SUMMARY

Computer Science graduate with hands-on experience in software engineering, full-stack development, responsive web applications, DevOps and cybersecurity. Proficient in Python, Django, Next.js, React, TypeScript, Docker and Kubernetes, with experience building production-ready software solutions, scalable web applications and deploying cloud-hosted systems.

EXPERIENCE

Python Full Stack Intern | Skyllx Technologies Pvt. Ltd., Bengaluru

Jan 2026 – May 2026

- Developed backend modules and REST APIs using Python, Django and MySQL.
- Assisted in testing, debugging and feature implementation for web applications.

EDUCATION

Channabasaveshwara Institute of Technology

2022 – 2026

B.E. in Computer Science and Engineering · Tumkur, India | GPA: 8.38/10

TECHNICAL SKILLS

Languages: Python, Java, C, TypeScript, JavaScript

Frontend: Next.js, React, HTML, CSS

Backend: Django, REST APIs

Databases: MySQL, SQLite

DevOps & Tools: Git, GitHub, GitHub Actions, Docker, Kubernetes, Cloudflare, VS Code, Ubuntu

AI & Data: Generative AI, LLMs, Prompt Engineering, NumPy, Pandas

PROJECTS

Arcanelinx Corporate Website — *Next.js, React, TypeScript, Cloudflare*

- Designed and developed a responsive corporate website for an industrial automation company using Next.js and TypeScript.
- Built responsive layouts, quotation workflow, contact validation, downloadable company profiles and SEO metadata.
- Deployed the website using Cloudflare with GitHub version control and production build validation.

Hostel Allocation System — *Django, Docker, Kubernetes, SQLite*

- Developed a hostel management platform with role-based authentication, room allocation, and administrative dashboards.
- Containerized the application using Docker and deployed it on Kubernetes using Deployments and Services.
- Implemented configuration management, health checks, and horizontal scaling for reliable deployments.

Integrated Ethical Phishing Attack and Cyber Defense Evaluation System — *Splunk SIEM, SET, Apache*

- Developed an integrated cybersecurity platform combining ethical phishing simulation with Splunk SIEM for centralized log monitoring and real-time threat analysis.
- Configured Apache log collection using Splunk Universal Forwarder and SPL queries for threat detection and cyber defense evaluation.

Real-Time Multi-Client Chat Application — *C, TCP Sockets, POSIX Threads*

- Built a concurrent chat server enabling multiple clients to communicate in real time using TCP sockets.
- Implemented multithreaded client handling with POSIX Threads for efficient message broadcasting and reliable communication.

CERTIFICATIONS

Generative AI Leader Track (Google Cloud) · **AI & ML Data Science Bootcamp** (Udemy) · **Foundations of Cybersecurity** (Coursera) · **100 Days of Code: Python Bootcamp** (Udemy) · **Full Stack Developer Bootcamp** (GeeksforGeeks)

LEADERSHIP & ACTIVITIES

Led **BUILDATHON-2K25**, a national-level hackathon involving **400+ participants**, coordinating planning, technical teams, and event execution.
